

Clean Energy for All
Harrisonburg

DEAR _____

We are ready for the clean energy transition.

We know that climate change threatens our world, especially our vulnerable neighbors first & worst. I am a resident of _____, and we want to take action as a **community**.

We ask that you:

1. Direct our electric utility to provide 50% solar and wind energy for our electric grid by 2025 and 100% by 2030.
2. Improve energy efficiency by 25% in municipal and school buildings by 2025 reducing long-term energy costs.
3. Create programs that incentivize weatherization and efficiency to reduce energy costs for city residents.

THANK YOU FOR TAKING ACTION!

SINCERELY, _____
